**Finished For You**

## Nutraceutical innovator, from research to finished products.

The human microbiota is a complex and dynamic ecosystem composed of billions of microorganisms that interact continuously with our body and contribute to the balance of essential physiological processes. Its equilibrium can be influenced by a wide range of internal and external factors, making the support of this delicate system increasingly important across many scientific fields.

With decades of expertise in microbiology and microbiota modulation, we develop scientifically supported probiotic blends designed to meet the evolving needs of the human microbiota. Daily exposure to environmental, physical, and emotional stressors can disrupt microbial balance: our targeted strains work synergistically to restore harmony across the body's multiple microbiomes, promoting enhanced overall well-being and long-lasting vitality.

## Finished for You: your complete solution for supplement development

Our Finished for You service supports customers throughout the entire formulation and production process, offering a wide range of formats and solutions across diverse health areas. From capsules and powders to liquid formulations, our expert team manages every step with precision, ensuring your products achieve the highest standards of quality, safety and efficacy.

Our formulation team offers two flexible pathways to meet your needs:

### Pre-Formulated Products

A ready-to-customize product line featuring carefully selected active ingredients that address key wellness areas. These solutions allow rapid time-to-market by integrating your brand without waiting for new development.

### Custom-Made Products

Tailored support to define and create your exclusive formula, format, and product positioning. This option enables a fully personalized solution designed to differentiate your brand and deliver a unique market launch.

# Pre-Formulated Products

Designed for Speed and Quality

Science-driven,  
multi-action formulations

Fast, launch-ready  
solutions

Prototypes & samples  
available

Agile supply chain with  
low MOQ & short lead times

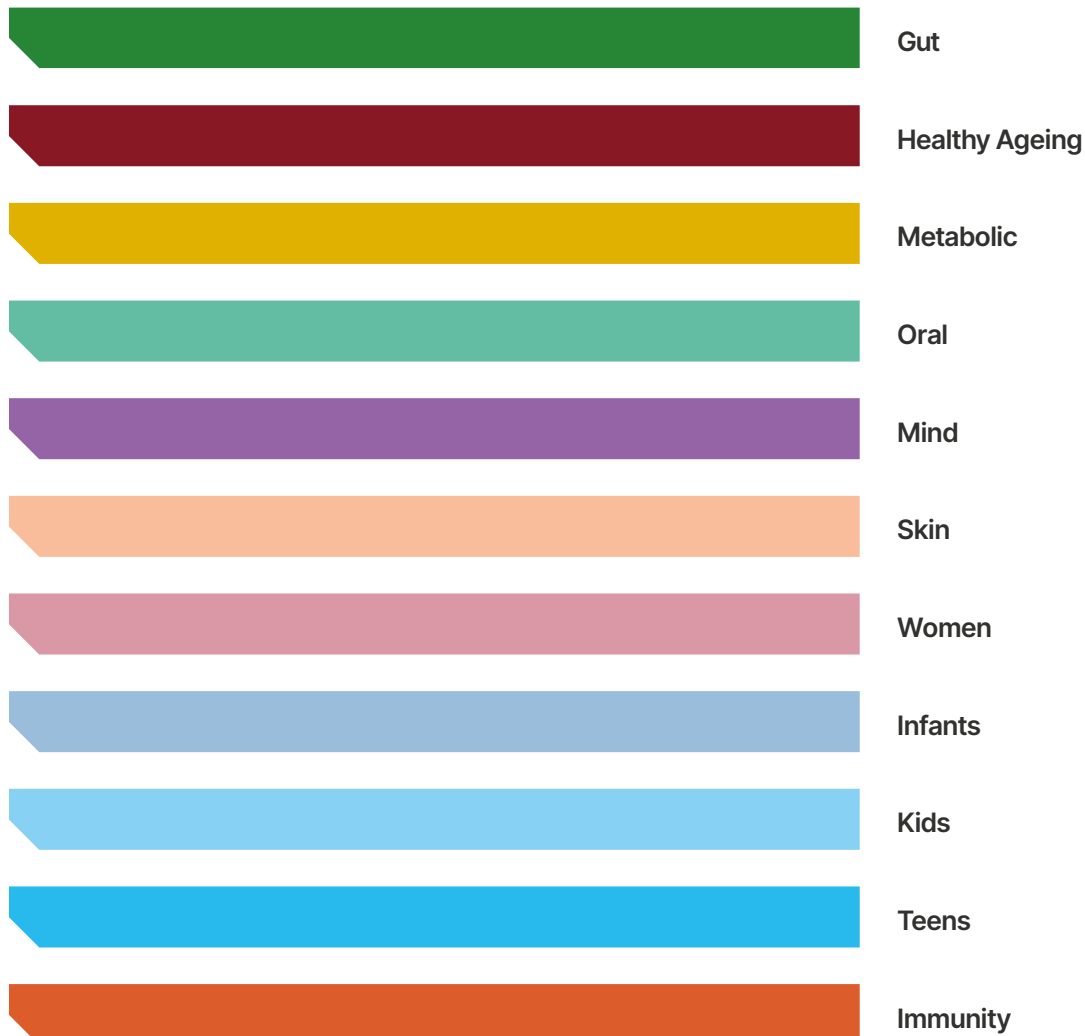

24-months stability,  
no refrigeration

Full regulatory &  
marketing support

# PreProPost Gummies

## A cuddle for the gut

Taking care of your microbiota can be both simple and enjoyable. These tasty gummies are designed to support gut health in a convenient and pleasant way, making daily supplementation easy to maintain. The formula combines three types of biotics – prebiotics, probiotics and postbiotics – for a comprehensive and synergistic action on the intestinal ecosystem. Enriched with Vitamin D, it helps support the balance of the gut microbiota while contributing to the normal function of the immune system. By promoting a healthy gut environment, this product helps support digestion, overall well-being and daily immune defenses.

Suggested for: adults and young adults looking for a simple and enjoyable way to support gut balance and immune function as part of their daily routine.

## Longevity starts from the gut

Healthy Ageing begins with a balanced gut ecosystem. Over time, changes in gut homeostasis can influence inflammation, immunity, and overall vitality. This carefully crafted supplement combines a clinically tested probiotic blend with a rich plant-based source of omega-3, 6, and 9 fatty acids plus vitamins D and E. Together, they help maintain gut balance, support immune function, and nourish the body at the cellular level. Ahiflower oil's unique fatty acid profile supports heart, brain, and joint health, while the probiotic and vitamins help reduce age-related low-grade inflammation and strengthen bone and muscle resilience. The result is a comprehensive formula that keeps you active, energized, and strong, helping you stay resilient through the years.

Suggested for: adults over 50.

## Comfort for little bellies

In the first months of life, a baby’s digestive system is still developing. This immaturity can sometimes lead to colic, bloating and episodes of inconsolable crying, causing discomfort for both babies and parents. This formula features a clinically studied probiotic strain, specifically selected for infants, to help support intestinal function and the digestion of milk. By promoting a balanced gut environment, it helps soothe digestive discomfort and support the natural development of the microbiota in early life.

Suggested for: newborns, whether breastfed or formula-fed, to support digestive function and help relieve discomfort associated with colic and an immature gut.

# GutHero

## A superhero for their gut

During growth, a child's microbiome is constantly evolving and plays a key role in overall well-being. It contributes to immune system development, nutrient absorption and metabolic balance, making it essential to support a healthy and diverse gut microbiota. Specifically designed for children, this supplement combines Bifidobacteria and Lactobacilli, prebiotic fiber and Vitamin D to support gut balance and immune function, helping kids stay strong during growth. Easy to take and with a pleasant taste, it is ideal not only after antibiotic treatments, but also as a daily ally during periods of increased physical or environmental challenges.

Suggested for: children +3 years, to support gut health, immune defenses and overall well-being during growth, especially during seasonal changes, after antibiotics or in demanding periods.

# ArmyGut

## Stronger, for all the season

Our natural defenses fluctuate throughout the year. Stress, seasonal changes and lifestyle factors can make the body more vulnerable to external threats. The gut hosts around 70% of the immune system’s cells, acting as a key regulatory center for the body’s defenses. Supporting the gut microbiota helps strengthen the immune response and maintain overall well-being. This formula combines a targeted blend of probiotics, prebiotic fiber and Vitamin D to nourish the microbiota and support immune function. It helps the body stay prepared to respond efficiently to seasonal challenges and periods of increased exposure.

Suggested for: all adults looking to support immune defenses, particularly during seasonal changes and periods of increased vulnerability.

**Breath free, defend faster**

The immune system works continuously to protect the body from external challenges. Supporting it with the right nutrients helps maintain resilience and overall well-being throughout the year. This formula combines a science-based postbiotic with vitamin D3, Zinc and Elderberry extract, specifically selected to support respiratory health and immune function. Postbiotics help support the body's natural defense mechanisms, while Vitamin D3 and Zinc contribute to the normal function of the immune system. Elderberry is traditionally used to support the body during seasonal challenges. Together, these ingredients help support the body's response to seasonal threats and may help reduce the severity and duration of cold-like symptoms.

Suggested for: adults looking to support immune defenses and maintain daily vitality, particularly during periods of increased stress or seasonal changes.

# Custom-Made Products

## Your Vision, Our Expertise

Define your formula, designed around your unique objectives. Our Custom-Made Products service offers a comprehensive and collaborative approach that transforms your concept into a distinctive, premium finished product, fully aligned with your market positioning, target consumers, and brand identity. We work alongside you at every stage, combining scientific know-how, formulation expertise, and creative strategies to develop solutions that go beyond standard offerings. Whether your goal is innovation, exclusivity, or targeted functionality, we ensure that each blend reflects the highest standards of quality, precision, and differentiation.

### From Concept to Final Formula

In line with the intended purpose of the product, our specialists design formulations that integrate selected strains, complementary ingredients, and functional components aligned with your objectives. Each blend is developed with a structured approach that balances scientific rationale, feasibility, and market relevance, supporting both product performance and positioning.

### Tailored Formats and Functionalities

A custom formulation deserves the right format and user experience. We offer a broad range of delivery systems, including capsules, powders, sachets, liquids, and innovative delivery technologies, allowing you to select the solution that best enhances your formula, ensures stability, and resonates with your audience.

### Scientific, Marketing & Launch Support

We provide end-to-end support from scientific validation to market launch, assessing ingredient compatibility, quality, stability, and functional synergies. We guide appropriate evaluations and support product positioning, documentation, sales training, and clear scientific storytelling to ensure credibility and a confident market entry.

### Prototype Development and Samples

Before launch, we develop prototypes and pilot samples to bring your concept to life. This phase allows evaluation of taste, format, and performance under real-use conditions, supporting internal decisions, stakeholder alignment, and effective partner or customer presentations.
